Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

BCA graduate and Master of Computer Applications (MCA) learner with a practical foundation in Python, web development, databases and software engineering. Interested in building useful, user-focused applications and improving software quality through hands-on projects. Also developing foundational knowledge of cybersecurity, web application security and penetration-testing concepts through independent study and controlled learning labs. Eager to contribute, learn and grow in an entry-level software development or technical role.

TECHNICAL SKILLS

Programming: Python, JavaScript, PHP, HTML, CSS
Web & Frameworks: Django (foundational/project experience), React (beginner), responsive web fundamentals
Database: MySQL, SQLite
Tools: Git, GitHub, Visual Studio Code, Figma
Software Engineering: SDLC fundamentals, requirements analysis, system design, debugging and documentation

CYBERSECURITY & TECHNICAL LEARNING

- **Cybersecurity foundations:** Studying ethical hacking and penetration-testing fundamentals, including reconnaissance concepts, common web application risks and basic security assessment workflows.
- **Web security:** Familiar with the purpose and key risk areas covered by the OWASP Top 10; continuing to study secure authentication, access control and security misconfiguration.
- **Hands-on learning:** Maintaining cybersecurity notes and lab walkthroughs in the PENTESTGARAGE-REDTEAM GitHub repository, including Windows privilege-escalation learning material. Practice is limited to authorized, controlled environments.

Note: These are self-study and lab-based learning areas, not professional penetration-testing experience or cybersecurity certifications.

PROJECTS

EXPENSE_SHA – Expense Tracker (BCA Academic Project)

- Developed an expense-tracking application concept to record and organize personal expenses.
- Worked with Python, Django and SQLite, with machine-learning-based expense categorization and basic prediction/recommendation features explored in the project.
- Focused on practical application development, data handling and presenting useful expense insights.

PENTESTGARAGE-REDTEAM – Cybersecurity Learning Repository

- Organized self-study notes and walkthrough documentation covering selected red-team and Windows privilege-escalation topics.
- Uses the repository to document learning progress and reinforce security concepts in a controlled, authorized learning context.

EDUCATION

Master of Computer Applications (MCA) — Indira Gandhi National Open University (IGNOU)

July 2026 intake | Ongoing

Bachelor of Computer Applications (BCA) — College of Applied Science (IHRD), Mavelikkara, University of Kerala

2023–2026 | Completed

CERTIFICATIONS

- Google — Python (Certificate ID: ZORDW7N7ELR7)
- IBM — Software Engineering (Certificate ID: VLPW0JRNABV2)
- Microsoft — Computers, Operating Systems and Security (Certificate ID: S5O2FEEZHROI)
- ADCA — Advanced Diploma in Computer Applications, CESI

ADDITIONAL STRENGTHS

Project-based learning • Technical documentation • Problem-solving • Team collaboration • Willingness to learn new tools and technologies
